PROFESSIONAL SUMMARY

Python/Django backend developer with hands-on experience designing and shipping REST APIs for data-driven web applications. Proficient in Django REST Framework, PostgreSQL, JWT authentication, role-based access control, and Git-based collaboration, with practical exposure to query optimization, unit testing, and clean code practices. Delivered production-ready API systems with documented endpoints and Docker-ready deployments, targeting backend engineering roles and SaaS MVP work.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django REST Framework (DRF), REST API Design, JWT Authentication, Role-Based Access Control (RBAC)
- **Database:** PostgreSQL, MySQL, SQLite, Django ORM, Query Optimization, Database Schema Design, Migrations
- **Payments & Integrations:** Khalti API, eSewa API, KYC Verification Workflows
- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+, basics for API demos), React.js (in progress)
- **DevOps & Tools:** Git, GitHub, Docker, Gunicorn, WhiteNoise, Render, Vercel, PythonAnywhere, Postman, VS Code
- **Concepts:** MVT Architecture, RESTful Principles, CRUD Operations, OOP, SaaS MVP Patterns, Feature Branching, Code Reviews, Algorithms, Unit Testing

EXPERIENCE

Sajha Infotech PVT. LTD.

Backend Development Trainee

Feb 2026 - Jul 2026

Kathmandu, Nepal

- Completed hands-on training in Python, Django, and Django REST Framework, applying object-oriented programming, algorithms, and unit testing while building REST API modules for a student management system covering attendance, grading, and user management.
- Wrote and optimized PostgreSQL queries as part of the training curriculum, achieving approximately 30% reduction in average API response time under load through query optimization.
- Collaborated with fellow trainees and mentors through GitHub pull requests and code reviews, maintaining clean Git history across feature branches.
- Documented API endpoints via Postman collections, gaining practical experience in API documentation and developer handoff workflows.

PROJECTS

Agritech | Agriculture Marketplace Platform (In Progress)

- Implemented role-based authentication and authorization to distinguish farmer and buyer permissions, using JWT-secured API access and KYC verification workflows for user onboarding.
- Built cart, order, and negotiation modules that let buyers negotiate pricing directly with farmers before checkout, supported by a real-time inquiry pipeline with contact-sharing notifications.
- Integrated Khalti and eSewa payment gateways to support secure, market-relevant digital transactions for the Nepali agriculture sector.
- Designed RESTful APIs with Django REST Framework's DefaultRouter, including a filterable and searchable product catalog by category, and prepared the application for deployment with Docker, Gunicorn, and WhiteNoise.

Shabdhbandhar | English-to-Nepali Dictionary Web App

- Engineered a fault-tolerant Unicode search engine with automated database ingestion of 10,000+ word entries and session-based search history.
- Implemented a 'Word of the Day' feature using Django's scheduler, improving daily active user engagement.

CalcPro | Multi-Functional Web Calculator

- Built a full-stack calculator app (Basic, Scientific, Programmer, Financial modes) backed by a DRF REST API with safe mathematical expression evaluation.
- Designed a mobile-first responsive UI with Vite build tooling; deployed to Render with zero-downtime configuration.

Marketplace App | Multi-Vendor Marketplace API

- Built a modular, production-ready multi-vendor marketplace backend with buyer, seller, and admin roles, custom app slicing, and environment-driven security configuration.
- Implemented a contextual user-to-user messaging system and product listings with discount logic.

Developer Portfolio | Personal Website

- Designed and deployed a dark-navy single-page portfolio showcasing backend projects, tech stack, and contact functionality with live GitHub and LinkedIn integration.

EDUCATION

Mahendra Multiple Campus

2025

Bachelor of Information Technology (BIT), Information Technology

Mahendra Multiple Campus, Nepalgunj, Banke, Nepal

- **Achievements:** Final Year Project: "AcadFlow": Student Management System built solo with role-based authentication, attendance tracking, grade management, and server-side PDF export.
- **Coursework:** Data Structures, DBMS, Web Technologies, Software Engineering, OOP

CERTIFICATIONS

- CS50's Web Programming with Python and JavaScript: Harvard / edX
- Django REST Framework: Udemy / freeCodeCamp (project-based)
- Git & GitHub for Developers: self-paced

ADDITIONAL INFORMATION

- * **Languages:** Nepali (Native), English (Professional: Read/Write/Speak)
- * **GitHub:** 197+ contributions since March 2026; public repositories with live demos, API documentation, and clean READMEs
- * **Open Source:** Actively building public projects targeting discoverability and recruiter review
- * **Availability:** Immediately available for on-site (Kathmandu) and remote roles
