

MANOJ K.C.

Python & Django Backend Developer | Django REST Framework | PostgreSQL

manojkc1dev@gmail.com | manojkc1.com.np | github.com/manojkc1dev | linkedin.com/in/manojkc1dev

Kathmandu, Nepal

PROFESSIONAL SUMMARY

Python/Django backend developer with hands-on experience designing and shipping REST APIs for data-driven and marketplace web applications. Proficient in Django REST Framework, PostgreSQL, JWT authentication, role-based access control, and third-party payment integration (Khalti, eSewa). Delivered production-ready API systems with optimized queries, documented endpoints, and Docker-ready deployments. Targeting backend engineering roles and SaaS MVP contracts where clean architecture, reliable APIs, and maintainable code matter.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django REST Framework (DRF), REST API Design, JWT Authentication, Role-Based Access Control (RBAC)
- **Database:** PostgreSQL, MySQL, SQLite, Django ORM, Query Optimization, Database Schema Design, Migrations
- **Payments & Integrations:** Khalti API, eSewa API, KYC Verification Workflows
- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+, basics for API demos), React.js (in progress)
- **DevOps & Tools:** Git, GitHub, Docker, Gunicorn, WhiteNoise, Render, Vercel, PythonAnywhere, Postman, VS Code
- **Concepts:** MVT Architecture, RESTful Principles, CRUD Operations, OOP, SaaS MVP Patterns, Feature Branching, Code Reviews

EXPERIENCE

Backend Development Trainee | Sajha Infotech PVT. LTD.

Feb 2026 - Jul 2026

Kathmandu, Nepal (On-site)

- Completed hands-on training in Python, Django, and Django REST Framework, building REST API modules for a student management system covering attendance, grading, and user management.
- Wrote and optimized PostgreSQL queries as part of the training curriculum, achieving approximately 30% reduction in average API response time under load.
- Collaborated with fellow trainees and mentors through GitHub pull requests and code reviews, maintaining clean Git history across feature branches.
- Documented API endpoints via Postman collections, gaining practical experience in API documentation and developer handoff workflows.

PROJECTS

Agritech | Agriculture Marketplace Platform (In Progress)

Python, Django, Django REST Framework, PostgreSQL, React.js, Tailwind CSS | GitHub

- Architected a role-based authentication and authorization system distinguishing farmer and buyer permissions, with JWT-secured API access and KYC verification workflows for user onboarding.
- Built cart, order, and negotiation modules enabling buyers to negotiate pricing directly with farmers before checkout, backed by a real-time inquiry pipeline with contact-sharing notifications.
- Integrated Khalti and eSewa payment gateways to support secure, market-relevant digital transactions for the Nepali agriculture sector.
- Designed RESTful APIs using DRF's DefaultRouter with a filterable, searchable product catalog by category, and Docker-ready deployment using Gunicorn WSGI server and WhiteNoise static asset handling.

Shabdhahbandar | English-to-Nepali Dictionary Web App

Python, Django, SQLite, JavaScript | Live Demo | GitHub

- Engineered a fault-tolerant Unicode search engine with automated database ingestion of 10,000+ word entries and session-based search history.
- Implemented a 'Word of the Day' feature using Django's scheduler, improving daily active user engagement.

CalcPro | Multi-Functional Web Calculator

Django REST Framework, JavaScript, React, Vite | Live Demo | GitHub

- Built a full-stack calculator app (Basic, Scientific, Programmer, Financial modes) backed by a DRF REST API with safe mathematical expression evaluation.
- Designed a mobile-first responsive UI with Vite build tooling; deployed to Render with zero-downtime configuration.

Marketplace App | Multi-Vendor Marketplace API

Python, Django, MySQL | GitHub

- Built a modular, production-ready multi-vendor marketplace backend with buyer, seller, and admin roles, custom app slicing, and environment-driven security configuration.
- Implemented a contextual user-to-user messaging system and product listings with discount logic.

Developer Portfolio | Personal Website

HTML5, Tailwind CSS, JavaScript, Vercel | Live Portfolio | GitHub

- Designed and deployed a dark-navy single-page portfolio showcasing backend projects, tech stack, and contact functionality with live GitHub and LinkedIn integration.

EDUCATION

Bachelor of Information Technology (BIT)

Graduated 2025

Mahendra Multiple Campus, Nepalgunj, Banke, Nepal

- Relevant coursework: Data Structures, DBMS, Web Technologies, Software Engineering, OOP.
- Final Year Project: "AcadFlow": Student Management System built solo with role-based authentication, attendance tracking, grade management, and server-side PDF export.

CERTIFICATIONS & CONTINUED LEARNING

- CS50's Web Programming with Python and JavaScript | Harvard / edX
- Django REST Framework | Udemy / freeCodeCamp (project-based)
- Git & GitHub for Developers | self-paced
- Currently learning: React.js, JavaScript ES6+, Frontend-Backend Integration

ADDITIONAL INFORMATION

- **Languages:** Nepali (Native), English (Professional: Read/Write/Speak)
- **GitHub:** 197+ contributions since March 2026; public repositories with live demos, API documentation, and clean READMEs
- **Open Source:** Actively building public projects targeting discoverability and recruiter review
- **Availability:** Immediately available for on-site (Kathmandu) and remote roles
